Bridgewell selects Sequest's TIER All-in-One hosted solution

(4/6/2010)

Press Release

Lisle, IL — Sequest, a leading business solutions and software provider for the health and human services industry, announced Bridgewell has purchased Sequest's TIER All-in-One hosted solution for their new electronic environment. For more than 50 years, Bridgewell has been a leading provider of quality services to adults with disabilities on the North Shore with programs in 18 communities north of Boston. Bridgewell chose All-In-One to rapidly implement the TIER solution with plans to automate their operations. The All-in-One hosted solution will allow Bridgewell to focus on what they are best at providing excellent service to individuals and families.

Bridgewell was impressed with TIER and its flexibility to adapt to their needs without a lengthy implementation. "After struggling with another vendor's implementation we have been really impressed with how robust the TIER solution is and its rapid implementation capability" stated Bob Stearns, CEO of Bridgewell. "In our experience, having a system designed by people who have worked in similar settings as ours gives us the confidence to know the system will fit our needs."

Sequest's CEO, Bill Connors, commented, "We are privileged to add Bridgewell to the growing number of partnerships we have and look forward to working with the Bridgewell team to achieve their goals."
